Author Index

Abe, A., see Ukisu, Y. 147
Ansell, G.P., Diwell, A.F., Golunski, S.E., Hayes, J.W., Rajaram, R.R., Truex, T.J. and Walker, A.P.
Mechanism of the lean NO_x reaction over Cu/ZSM-5 81
Armor, J.N., see Li, Y. 239
Avranas, A., Poulios, I., Kypri, C., Jannakoudakis, D. and Kyriakou, G.
Heterogeneous photocatalytic degradation of the cationic surfactant dodecylpyridinum chloride 289
Balko, E.N., Przybylski, E. and Von Trentini, F.
Exhaustive liquid-phase catalytic hydrodehalogenation of chlorobenzenes 1
Bartholomew, C.H., see Gopalakrishnan, R. 165
Berty, J.M., see Stenger, Jr., H.G. 117
Brenner, A., see Halasz, I. 131
Burch, R. and Millington, P.J.
Role of propene in the selective reduction of nitrogen monoxide in copper-exchanged zeolites 101
Buzan, G.E., see Stenger, Jr., H.G. 117
Davidson, J.E., see Gopalakrishnan, R. 165
Daza, L., Mendioroz, S. and Pajares, J.A.
Mercury elimination from gaseous streams 277
D'Itri, J.L. and Sachtler, W.M.H.
Selective reduction of nitric oxide over Cu/ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
Diwell, A.F., see Ansell, G.P. 81
Golunski, S.E., see Ansell, G.P. 81
Gopalakrishnan, R., Stafford, P.R., Davidson, J.E., Hecker, W.C. and Bartholomew, C.H.
Selective catalytic reduction of nitric oxide by propane in oxidizing atmosphere over copper-exchanged zeolites 165
Halasz, I., Brenner, A. and Shelef, M.
Catalytic reduction of nitric oxide on PdO-MoO_3/γ-Al_2O_3 131
Hashimoto, K., see Songip, A.R. 153
Hayes, J.W., see Ansell, G.P. 81
Hecker, W.C., see Gopalakrishnan, R. 165
Ihara, M., see Yogo, K. L1
Jannakoudakis, D., see Avranas, A. 289
Kapteijn, F., see Stegenga, S. 257
Keith Hall, W., see Petunchi, J.O. L17
Keith Hall, W., see Petunchi, J.O. 303
Kharas, K.C.C.
Performance, selectivity, and mechanism in Cu-ZSM-5 lean-burn catalysts 207
Kharas, K.C.C., Robota, H.J. and Liu, D.J.
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
Kikuchi, E., see Yogo, K. L1
Kuwahara , H., see Songip, A.R. 153
Kypri, C., see Avranas, A. 289
Kyriakou, G., see Avranas, A. 289
Ladavos, A.K. and Pomonis, P.J.
Structure and catalytic activity of perovskites La-Ni-O supported on alumina and zirconia 27
Li, Y. and Armor, J.N.
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
Liu, D.J., see Kharas, K.C.C. 225
Liu, D.R. and Park, J.-S.
Electron microprobe characterization of phosphorus containing deposits on used automotive catalyst surfaces 49
Masuda, T., see Songip, A.R. 153
Mendioroz, S., see Daza, L. 277
Millington, P.J., see Burch, R. 101
Miyadera, T.
Alumina-supported silver catalysts for the selective reduction of nitric oxide with propene and oxygen-containing organic compounds 199
Mizuno, K., see Obuchi, A. 71
Moulijn, J.A., see Stegenga, S. 257
Nakamura, M., see Obuchi, A. 71
Obuchi, A., Ohi, A., Nakamura, M., Ogata, A., Mizuno, K. and Ohuchi, H.
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
Ogata, A., see Obuchi, A. 71
Ohi, A., see Obuchi, A. 71
Ohuchi, H., see Obuchi, A. 71
Pajares, J.A., see Daza, L. 277

Park, J.-S., see Liu, D.R. 49
Petunchi, J.O. and Keith Hall, W.
On the role of nitrogen dioxide in the mechanism of the selective reduction of NO_x over Cu-ZSM-5 zeolite L17
Petunchi, J.O., Sill, G. and Keith Hall, W.
Studies of the selective reduction of nitric oxide by hydrocarbons 303
Pomonis, P.J., see Ladavos, A.K. 27
Poulios, I., see Avranas, A. 289
Przybylski, E., see Balko, E.N. 1
Rajaram, R.R., see Ansell, G.P. 81
Robota, H.J., see Kharas, K.C.C. 225
Ross, J.R.H., see Xue, E. 183
Sachtler, W.M.H., see D'Itri, J.L. L7
Sato, S., see Ukisu, Y. 147
Seshan, K., see Xue, E. 183
Shelef, M., see Halasz, I. 131
Sill, G., see Petunchi, J.O. 303
Songip, A.R., Masuda, T., Kuwahara , H. and Hashimoto, K.
Test to screen catalysts for reforming heavy oil from waste plastics 153
Stafford, P.R., see Gopalakrishnan, R. 165
Stegenga, S., Van Soest, R., Kapteijn, F. and Moulijn, J.A.
Nitric oxide reduction and carbon monoxide oxidation over carbon-supported copper–chromium catalysts 257
Stenger, Jr., H.G., Buzan, G.E. and Berty, J.M.
Chlorine capture by catalyst–sorbents for the oxidation of air pollutants 117
Terasaki, I., see Yogo, K. L1
Truex, T.J., see Ansell, G.P. 81
Tufano, V. and Turco, M.
Kinetic modelling of nitric oxide reduction over a high-surface area V_2O_5–TiO_2 catalyst 9
Turco, M., see Tufano, V. 9
Ukisu, Y., Sato, S., Abe, A. and Yoshida, K.
Possible role of isocyanate species in NO_x reduction by hydrocarbons over copper-containing catalysts 147
Van Ommen, J.G., see Xue, E. 183
Van Soest, R., see Stegenga, S. 257
Von Trentini, F., see Balko, E.N. 1
Walker, A.P., see Ansell, G.P. 81
Xue, E., Seshan, K., Van Ommen, J.G. and Ross, J.R.H.
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
Yogo, K., Ihara, M., Terasaki, I. and Kikuchi, E.
Selective catalytic reduction of nitric oxide by ethene on gallium ion-exchanged ZSM-5 under oxygen-rich conditions L1
Yoshida, K., see Ukisu, Y. 147

Applied Catalysis, 2 (1993)
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject Index

air pollution
Chlorine capture by catalyst-sorbents for the oxidation of air pollutants 117
alumina
Structure and catalytic activity of perovskites La-Ni-O supported on alumina and zirconia 27
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
Possible role of isocyanate species in NO_x reduction by hydrocarbons over copper-containing catalysts 147
Alumina-supported silver catalysts for the selective reduction of nitric oxide with propene and oxygen-containing organic compounds 199
automotive catalyst
Electron microprobe characterization of phosphorus containing deposits on used automotive catalyst surfaces 49
bentonite
Mercury elimination from gaseous streams 277
butane (iso-)
Studies of the selective reduction of nitric oxide by hydrocarbons 303
carbon monoxide oxidation
Structure and catalytic activity of perovskites La-Ni-O supported on alumina and zirconia 27
Nitric oxide reduction and carbon monoxide oxidation over carbon-supported copper–chromium catalysts 257
carbon support
Nitric oxide reduction and carbon monoxide oxidation over carbon-supported copper–chromium catalysts 257
catalyst deactivation
Electron microprobe characterization of phosphorus containing deposits on used automotive catalyst surfaces 49
catalytic reforming
Test to screen catalysts for reforming heavy oil from waste plastics 153
cesium
Possible role of isocyanate species in NO_x reduction by hydrocarbons over copper-containing catalysts 147
CFC's
Chlorine capture by catalyst-sorbents for the oxidation of air pollutants 117
CH_4
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
chlorinated aromatic
Exhaustive liquid-phase catalytic hydrodehalogenation of chlorobenzenes 1
chlorobenzene
Exhaustive liquid-phase catalytic hydrodehalogenation of chlorobenzenes 1
Cobalt
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
coke
Selective reduction of nitric oxide over Cu/ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
copper
On the role of nitrogen dioxide in the mechanism of the selective reduction of NO_x over Cu-ZSM-5 zeolite L17
Role of propene in the selective reduction of nitrogen monoxide in copper-exchanged zeolites 101
Chlorine capture by catalyst-sorbents for the oxidation of air pollutants 117
Possible role of isocyanate species in NO_x reduction by hydrocarbons over copper-containing catalysts 147
copper–chromium catalyst
Nitric oxide reduction and carbon monoxide oxidation over carbon-supported copper–chromium catalysts 257
copper-ZSM
Studies of the selective reduction of nitric oxide by hydrocarbons 303
Cu/ZSM-5
Mechanism of the lean NO_x reaction over Cu/ZSM-5 81
Cu-ZSM-5
Selective reduction of nitric oxide over Cu/

ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
Performance, selectivity, and mechanism in Cu-ZSM-5 lean-burn catalysts 207
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
deactivation
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
dechlorination
Exhaustive liquid-phase catalytic hydrodehalogenation of chlorobenzenes 1
diesel
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
diesel particulate removal
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
dodecylpyridinum chloride
Heterogeneous photocatalytic degradation of the cationic surfactant dodecylpyridinum chloride 289
electron microprobe
Electron microprobe characterization of phosphorus containing deposits on used automotive catalyst surfaces 49
emission control
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
EPMA
Electron microprobe characterization of phosphorus containing deposits on used automotive catalyst surfaces 49
ethene
Selective catalytic reduction of nitric oxide by ethene on gallium ion-exchanged ZSM-5 under oxygen-rich conditions L1
EuroPt-1
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
EXAFS
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
exhaust
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
exhaust-gas
Mechanism of the lean NO_x reaction over Cu/ZSM-5 81
Catalytic reduction of nitric oxide on PdO-MoO_3/γ-Al_2O_3 131
exhaust gas purification
Nitric oxide reduction and carbon monoxide oxidation over carbon-supported copper–chromium catalysts 257
gallium
Selective catalytic reduction of nitric oxide by ethene on gallium ion-exchanged ZSM-5 under oxygen-rich conditions L1
gasoline
Test to screen catalysts for reforming heavy oil from waste plastics 153
halocarbons
Chlorine capture by catalyst–sorbents for the oxidation of air pollutants 117
heterogeneous photocatalysis
Heterogeneous photocatalytic degradation of the cationic surfactant dodecylpyridinum chloride 289
hydrocarbon
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
Possible role of isocyanate species in NO_x reduction by hydrocarbons over copper-containing catalysts 147
hydrocarbons
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
hydrodechlorination
Exhaustive liquid-phase catalytic hydrodehalogenation of chlorobenzenes 1
hydro- dehalogenation
Exhaustive liquid-phase catalytic hydrodehalogenation of chlorobenzenes 1
hydrogen sulfide
Mercury elimination from gaseous streams 277
kinetics
Kinetic modelling of nitric oxide reduction over a high-surface area V_2O_5–TiO_2 catalyst 9
lean NO_x

Mechanism of the lean NO_x reaction over Cu/ZSM-5 81
manganese
Chlorine capture by catalyst–sorbents for the oxidation of air pollutants 117
mechanism
Mechanism of the lean NO_x reaction over Cu/ZSM-5 81
Performance, selectivity, and mechanism in Cu-ZSM-5 lean-burn catalysts 207
mercury elimination
Mercury elimination from gaseous streams 277
mercury vapours
Mercury elimination from gaseous streams 277
metal exchange
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
methane
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
molybdenum
Catalytic reduction of nitric oxide on PdO–MoO_3/γ-Al_2O_3 131
nitric oxide
Selective catalytic reduction of nitric oxide by ethene on gallium ion-exchanged ZSM-5 under oxygen-rich conditions L1
Mechanism of the lean NO_x reaction over Cu/ZSM-5 81
Alumina-supported silver catalysts for the selective reduction of nitric oxide with propene and oxygen-containing organic compounds 199
Studies of the selective reduction of nitric oxide by hydrocarbons 303
nitric oxide oxidation
Structure and catalytic activity of perovskites La-Ni-O supported on alumina and zirconia 27
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
nitric oxide reduction
Kinetic modelling of nitric oxide reduction over a high-surface area V_2O_5–TiO_2 catalyst 9
Catalytic reduction of nitric oxide on PdO–MoO_3/γ-Al_2O_3 131
Nitric oxide reduction and carbon monoxide oxidation over carbon-supported copper–chromium catalysts 257
nitric oxide reduction (by propane)
Selective catalytic reduction of nitric oxide by propane in oxidizing atmosphere over copper-exchanged zeolites 165
nitrogen dioxide
On the role of nitrogen dioxide in the mechanism of the selective reduction of NO_x over Cu-ZSM-5 zeolite L17
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
nitrogen dioxide and sulphur dioxide interaction
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
nitrogen dioxide (role in SCR)
Studies of the selective reduction of nitric oxide by hydrocarbons 303
nitrogen monoxide
Role of propene in the selective reduction of nitrogen monoxide in copper-exchanged zeolites 101
nitrogen oxides
On the role of nitrogen dioxide in the mechanism of the selective reduction of NO_x over Cu-ZSM-5 zeolite L17
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
nitrogen oxides reduction
Possible role of isocyanate species in NO_x reduction by hydrocarbons over copper-containing catalysts 147
nitrous oxide)
Catalytic reduction of nitric oxide on PdO–MoO_3/γ-Al_2O_3 131
NO_x
Selective reduction of nitric oxide over Cu/ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
Performance, selectivity, and mechanism

in Cu-ZSM-5 lean-burn catalysts 207
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
oxygen-containing organic compound
Alumina-supported silver catalysts for the selective reduction of nitric oxide with propene and oxygen-containing organic compounds 199
oxygen (role in SCR)
Studies of the selective reduction of nitric oxide by hydrocarbons 303
palladium
Catalytic reduction of nitric oxide on PdO-MoO_3/γ-Al_2O_3 131
palygorskite
Mercury elimination from gaseous streams 277
perovskites La-Ni-O
Structure and catalytic activity of perovskites La-Ni-O supported on alumina and zirconia 27
platinum
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
platinum/silica
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
polyethylene
Test to screen catalysts for reforming heavy oil from waste plastics 153
porous material
Electron microprobe characterization of phosphorus containing deposits on used automotive catalyst surfaces 49
propane
Selective reduction of nitric oxide over Cu/ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
propene
Selective reduction of nitric oxide over Cu/ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
Role of propene in the selective reduction of nitrogen monoxide in copper-exchanged zeolites 101
Alumina-supported silver catalysts for the selective reduction of nitric oxide with propene and oxygen-containing organic compounds 199
pyrolysis-reforming reactor
Test to screen catalysts for reforming heavy oil from waste plastics 153
reduction
Selective reduction of nitric oxide over Cu/ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
Performance, selectivity, and mechanism in Cu-ZSM-5 lean-burn catalysts 207
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
Studies of the selective reduction of nitric oxide by hydrocarbons 303
reduction
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
research octane number (RON)
Test to screen catalysts for reforming heavy oil from waste plastics 153
rhodium
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
SCR (contrasted to nitric oxide decomposition)
Studies of the selective reduction of nitric oxide by hydrocarbons 303
selective catalytic reduction (of NO)
Selective catalytic reduction of nitric oxide by propane in oxidizing atmosphere over copper-exchanged zeolites 165
selective reduction
Selective catalytic reduction of nitric oxide by ethene on gallium ion-exchanged ZSM-5 under oxygen-rich conditions L1
Performance of platinum-group metal catalysts for the selective reduction of nitrogen oxides by hydrocarbons 71
Role of propene in the selective reduction of nitrogen monoxide in copper-exchanged zeolites 101
selective reduction
Alumina-supported silver catalysts for the

selective reduction of nitric oxide with propene and oxygen-containing organic compounds 199
selectivity (nitrogen
Catalytic reduction of nitric oxide on PdO-MoO_3/γ-Al_2O_3 131
sepiolite
Mercury elimination from gaseous streams 277
silver
Alumina-supported silver catalysts for the selective reduction of nitric oxide with propene and oxygen-containing organic compounds 199
sodium carbonate
Chlorine capture by catalyst-sorbents for the oxidation of air pollutants 117
solid acid catalyst
Test to screen catalysts for reforming heavy oil from waste plastics 153
sulfurized silicates
Mercury elimination from gaseous streams 277
sulphur dioxide
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
sulphur dioxide oxidation
Catalytic control of diesel engine particulate emission: Studies on model reactions over a EuroPt-1 (Pt/SiO_2) catalyst 183
surfactants
Heterogeneous photocatalytic degradation of the cationic surfactant dodecylpyridinum chloride 289
titanium dioxide
Heterogeneous photocatalytic degradation of the cationic surfactant dodecylpyridinum chloride 289
toluene
Chlorine capture by catalyst-sorbents for the oxidation of air pollutants 117
vanadia-titania
Kinetic modelling of nitric oxide reduction over a high-surface area V_2O_5-TiO_2 catalyst 9
washcoat glaze
Electron microprobe characterization of phosphorus containing deposits on used automotive catalyst surfaces 49
waste plastics
Test to screen catalysts for reforming heavy oil from waste plastics 153
water
Possible role of isocyanate species in NO_x reduction by hydrocarbons over copper-containing catalysts 147
XRD
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
zeolite
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
zeolites
Selective reduction of nitric oxide over Cu/ZSM-5: The role of oxygen in suppressing catalyst deactivation by carbonaceous deposits L7
On the role of nitrogen dioxide in the mechanism of the selective reduction of NO_x over Cu-ZSM-5 zeolite L17
Mechanism of the lean NO_x reaction over Cu/ZSM-5 81
Role of propene in the selective reduction of nitrogen monoxide in copper-exchanged zeolites 101
Performance, selectivity, and mechanism in Cu-ZSM-5 lean-burn catalysts 207
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
zeolites (metal ion exchanged)
Selective catalytic reduction of nitric oxide by propane in oxidizing atmosphere over copper-exchanged zeolites 165
zinc oxide
Heterogeneous photocatalytic degradation of the cationic surfactant dodecylpyridinum chloride 289
zirconia
Structure and catalytic activity of perovskites La-Ni-O supported on alumina and zirconia 27
Zn-ZSM-5
Deactivation in Cu-ZSM-5 lean-burn catalysts 225
ZSM-5
Selective catalytic reduction of nitric oxide by ethene on gallium ion-exchanged ZSM-5 under oxygen-rich conditions L1
On the role of nitrogen dioxide in the mechanism of the selective reduction of NO_x over Cu-ZSM-5 zeolite L17
Selective catalytic reduction of NO_x with methane over metal exchanged zeolites 239
